Edit in settings.json

如图进入了setting的json文件,

将

```
"terminal.integrated.shell.windows": "C:\\WINDOWS\\System32\\cmd.exe",
```

注释掉，换成：（如果没有上面这行，直接添加下面的三行即可）

```
"terminal.integrated.shell.windows": "cmd.exe",
"terminal.integrated.env.windows": {"CMDER_ROOT": "[cmder_root]"},
"terminal.integrated.shellArgs.windows": ["/k", "[cmder_root]\\vendor\\init.bat"],
```

注意，terminal.integrated.shell.windows"确实是 "cmd.exe"，而不是cmder.exe。此外，要将[cmder_root]换成你的cmder安装路径。

重启vs code，打开terminal，可以看到：

表示用cmder打开成功了。
